Hello, my name is Darrell Foster, I'm a MIS major and I'm a senior.

I chose this as my career field – it was natural for me. I've been – I was in AOIT when I was in high school. I did a summer internship during that time period as well. Now I'm a Navy reservist doing – I'm an information systems technician for them, so MIS just came naturally to me.

The one that has impacted me the most I would say Dr. Lightner. She taught the statistics course and she made me feel like I could learn anything, you know, period. I thought I was gonna fail that class from jump and she broke it down and I feel like I can learn anything now. And then Dr. _____ as well. He broke down a database management course and has really been a change in my life in more ways than one.

So I'm proud to be a bronco because one, my mom's a bronco and there's a lot of people at my church that you know went to Fayetteville State as well and that is you know it's kinda like a heritage, kind of like a you know an inside joke in a way. And then two is me being a Navy reservist Fayetteville State has really accommodated me trying to get help as far as getting my benefits and things as well, so.
