COURSE ASSIGNMENTS:
Two Process Recordings (Competencies 2, 3, 4, 5, 7, 8)
Process recording will record verbatim the interaction between the student and the consumer in services at the placement agency. You are required to use the form in the field manual. The process recording is a valuable tool to help evaluate how the student is applying skills, knowledge, ethics and values to practice. It is also helpful in assisting the student in developing an awareness of self in the process of interviewing, assessment and intervention. In this exercise students will use oral and written professional communications that are consistent with the language of the
practicum setting and have an opportunity to evaluate both the efficacy of their interventions and the use of self in the process. There will be four categories in which the student will record information. They are 1) what the consumer said, 2) what the student intern said in response, 3) what the student intern was feeling and thinking during the interaction, for e.g. re: values reaction to consumers that either help or hurt the process and 4) the effectiveness of the interaction and alternative responses which might have produced a more desirable outcome.

First Process Recording Due Date
Second Process Recording Due Date:
