# "I'm glad I chose FSU."

I work as an HLA lab technologist at Labcorp's DNA Identification Division. I sent my resumé to Labcorp and I got called for an interview from two different DNA departments. The interview process wasn't easy but I felt fully prepared and confident in my answers because of the concepts I learned in my forensic classes. Many of the activities I'm doing at my job were done in my forensic science classes. I also knew the concepts and science behind what I was doing so that made training easier. Because of cost, many forensic science programs at other colleges lack this equipment so it benefited me to already have experience with this equipment at FSU. I'm glad I chose FSU's forensic science program because of how much it contributed to my success at my current job. I encourage others to join if they're interested in forensic science and they want to be ahead of the rest when they graduate. **-Mishal**

# "The facilities are excellent and the faculty are always open and helpful."

The Forensic Science program is probably one of the best programs at FSU. The facilities are excellent and the faculty are always open and helpful. If you think you may want to pursue Forensic Science as a career, then you should definitely check out FSU. The information and skills you'll learn will set you up for success in your future scientific career. **-Josh**

# "The Forensic Science program prepared me to be a confident forensic scientist."

## Careers

Graduating from the Forensic Science Program at FSU will prepare you for graduate school or several careers:

- Serologist
- Toxicologist
- Drug Analyst
- DNA Analyst
- Crime Scene Technician
- Trace Evidence Analyst
- Fingerprint Examiner
- Researcher in Biology, Biotechnology, or the Pharmaceutical Industry

The Forensic Science program is designed to give students a more individualized approach to their education. I am currently a Criminalist at a Guam Police Crime Laboratory working in the Drug Analysis unit. I utilize the skills and lab techniques that I learned directly from this program and my professors in my everyday work. Bridging my undergraduate education into my current Master's Degree program in Forensic Medicine was seamless. **-Alexandra**
