Life-changing television

This is your SECOND chance to attend this workshop if you missed out the first time...

UNC-TV is proud to be partnering with the Mathematics and Science Education Center at Fayetteville State University and THIRTEEN/WNET to offer **free "Get the Math"** training, classroom resources, stipends, and continuing education units (CEUs) to **50 middle and high school teachers** across North Carolina. Get The Math standard-based curriculum is designed to help middle and high school students develop algebraic thinking skills for solving real world problems. This high-impact training session will be conducted on Saturday, March 19, 2011 from 9am—4pm. **The training will occur at Fayetteville State University in the School of Education, Butler Building, Room 342. To register for this training, please contact: Grayling B. Williams (gwilli18@uncfsu.edu), 910-672-1316 or Jesse Baker (jlbakero1@uncfsu.edu), 910-672-1676.**

GET THE MATH is a convergent media project designed to help middle and high school students develop algebraic thinking skills for solving real world problems. Drawing on conventions of popular reality TV shows, video segments begin with profiles of young professionals, who then pose challenges connected to their jobs to two teams of teens. At that point viewers are encouraged to try the challenges themselves using interactive tools provided on the **GET THE MATH** website, before returning to the video to see the teams' solutions. Students can further explore the same algebra concepts through additional interactive challenges on the website.

Video segments and interactive challenges focus on how algebra is used in:

- Music
- Videogames
- Fashion

Don't Miss Out on this Free "Get The Math" Teacher Training, Free Classroom Resources, CEUs and Teacher Stipends to the First 40 Teachers to Register!!!!
