Universal Design for Learning

In the College Classroom

Come learn about the basic principles of Universal Design for Learning (UDL) in the college classroom. The goal of UDL is to reduce barriers to learning while optimizing levels of challenge and support for all types of learners. UDL is important in post-secondary education today because our students are so diverse. UDL is not a single, one-size-fits-all solution, but offers a blueprint of flexible approaches for creating instructional goals, methods, materials, and assessments for everyone.

UDL Strategies

Re-designing courses include:

✓ Multiple ways to represent information to be learned
✓ Multiple ways to motivate and engage students in learning
✓ Multiple ways for students to show mastery of a subject

KEY NOTE: Using the principles of UDL promotes active learning and provides a more accurate assessment of students’ performance and your teaching success.

Come Support UDL!!!

Bronco STAR and the Office of Faculty Development are thrilled to bring Dr. Barbara Levin, an expert in UDL, to our campus! Be sure not to miss out on this amazing opportunity to learn more about UDL and the faculty development opportunities that BroncoSTAR has to offer!

For more information contact Dr. Emily Lenning at elenning@uncfsu.edu or 672-2274
