

One of the reasons I chose to come to Fayetteville State was the proximity. It is close to my high school so I didn't feel as scared moving out. Another reason is because it's affordable and it's like a home. You come here and it's small so everyone knows everybody if you don't know anybody you must stay your room all day long.

Kind of every professor I've had helped me in some type of way. I know there's some professors that are not teaching here no more they still have an impact on me specifically in my department I know Dr. Santa and Dr. Miller they're one of the the motivating forces behind my writing and my public speaking so they had a great impact on me.

Get involved! You don't have to have a leadership role or play a sport or be in a Greek letter organization to be involved in campus. Volunteering make sure you attend events because it's already paid for it through tuition and just to make sure you always has a positive attitude because this is your college experience. Mine is gonna be different from yours regardless of what school we go to so just make sure you make the best of it.

I am proud to be a Bronco because there's no school better than Fayetteville State and I'll argue with anybody on that part. So they're shaping me for the real world and they're preparing me to get a career not a job and trying to be successful not just content.
