

My name is Bonnie Rogers and I'm a MSA student which means I'm a graduate student.

It was one of the closest schools but it also has a really good rating for having the MSA program.

Dr. Jones is extremely helpful. He is – he's cool, he talks to us, he explains well and he's just that professor that you want for any type of program at all. I don't care what program it is, you want that professor. He's that professor.

Let's see, my advice to come here is make sure you know which program you really want to be in. Talk to your professors for whatever you need. Make sure you talk to your advisor when you need to. And really study. Make sure you know APA style too cause most professors really want you to know the APA style.

The interesting part is learning how to do some stuff I've never learned how to do before. That I – just some of the apps and things that I've learned how to use that I've never used before that would be some of the interesting things.

I'm proud to be a Bronco because everybody just seems to like everybody here and just – it's a team effort here. I just like being a bronco because of that. Just seems to be a team effort.
