

My name is Zachary Hanson and my major is physical education.

Well, I've always been a sports fanatic my whole life and um I've always been interested in athletics and um just general lifting and stuff like that.

I mean, I'm from here. So I had to represent my hometown. It was just a great environment and great school. I can't complain.

Well, every time I step in Ms. Kershaw's room, I have a positive experience. So yeah, that's probably my favorite professor on campus. Well, she does the extra effort. She's one of the professors that are a lot – like very organized here. Very, very organized. She's just here to help whenever you need it. Her office is always open and her class is very organized and it's related to my major also, so I like that class a lot.

The professors made me feel very welcome to come here. From every perspective, they made sure I was welcomed and they helped me get organized on campus. So I would say more of a positive experience with the professors and advisors here.

You know – y'all gotta come to Fayetteville State. You know what it is!
