DEGREE TOTAL: 120 CREDITS

General Chemistry Concentration prepares students for careers as professional chemists and for graduate school. The curriculum offers a thorough fundamental knowledge of the major fields of chemistry, covering the general areas of analytical chemistry, biochemistry, inorganic chemistry, organic chemistry, and physical chemistry, plus many more specialized courses including computational chemistry, bioanalytical chemistry, bioinorganic chemistry, nanoscience and nanotechnology, medicinal chemistry, separation science, special topics in chemistry. Students gain laboratory experience in organic synthesis, analytical methods, physical chemical measurements, and spectroscopy. Undergraduates are encouraged to take full advantage of the scientific opportunities available in the department by joining a research group.
