

## 2019-20 New Teacher Preparation Survey: Response Rates

### Notes:

(1) Using NCDPI salary data from January 2020, we identified all teachers with 0 years of experience or a missing experience value. We sent the New Teacher Preparation Survey to all of these teachers in the spring of 2020

(2) We have excluded survey respondents who we could later confirm were NOT first year teachers

(3) We have excluded survey non-respondents who we could later confirm were NOT first year teachers

(4) Below, we report the total number of respondents and the total number of survey finishers. Individuals did NOT need to finish the survey for us to include their responses in the following tables
