Notification of Immunizations & Fillable Forms Requirements

North Carolina public law requires that you submit proof of your immunizations to Student Health within 30 days of the first day of class at Fayetteville State University. The North Carolina Department of Health and Human Services can answer your questions about this proof of immunization requirement. FSU Student Health can assist students with obtaining their immunization records. Student Health Services (uncfsu.edu)

If you do not provide proof of immunization, North Carolina public law requires Fayetteville State University to drop you from all classes. Failure to comply will result in a hold on your account. You will not be able to attend class or register for future classes until proof of compliance is provided. You may upload your immunization record to Patient Portal at https://uncfsu.medicatconnect.com/ by using your FSU E-mail credentials. Please contact Student Health if you have questions about the Patient Portal.

Step #1 Immunizations

Students 18 years of age or older

You may be missing the following Immunization requirements please check your Patient Portal at https://uncfsu.medicatconnect.com/.

* Tetanus (DTP, DTap, Td, Tdap) – 3 doses are required of which one must have been within the past 10 years
* MMR (Measles, Mumps, Rubella) – 2 doses are required
* Hepatitis B (Hep B) – 3 doses are required for students born on or after July 1, 1994
* Polio (OPV, IPV) – 3 doses are required for students under age 18
* Varicella (VAR) – 2 doses are required for students born on or after April 1, 2001
* Meningococcal Vaccine – 2 doses are required for students born on or after January 1, 2003 (Including residing in the residence hall)
* TB skin test (PPD or TST) or QuantiFERON-TB Gold Plus – are required for International Students

The record must have a health care provider's name and address and/or clinic stamp with the clinic's address. Upload your Immunization record under the "Upload" tab.

Accepted Forms of Immunization Documentation Include:

- Government or Health Department issued Personal Immunization Record
- High School Transcript or College/University Record
- Military Record with clinic stamp that includes the clinic's address
- Physician/Clinic Office Record with a clinic stamp that includes the clinic's address
- NC Immunization Registry or Other State Immunization Registry Records
- American Academy of Pediatrics Immunization Form with a clinic stamp that includes the clinic's address
- World Health Organization International Certificate of Vaccination
First, create image files of your completed Immunization Verification Form and other related documents. Here are some steps that may help you do this:

- Take a picture of the completed Immunization Verification Form with a camera or mobile device camera, making sure that the picture is legible. Save the images to your computer if completing the process by computer. If completing on your mobile device, you can use images directly from the device. Please be sure to only upload images of the Immunization Verification Form and related documents as these images become a permanent part of your medical record.

- Another option is to scan your Immunization Verification Form and related documents to your computer. You must be sure to save the files as an image file such as jpg, jpeg, png, gif and make sure the file size is under 4MB.

**Step #2 Complete the following Fillable Forms**

Please log in to the Student Patient Portal [https://uncfsu.medicatconnect.com/](https://uncfsu.medicatconnect.com/) to upload and complete the required health information. You may also scan this QR code.

a) Consent for Treatment  
b) FSU SHS COVID Agreement  
c) New Health History Form  
d) Note of Privacy Practices FSU  
e) Texting Opt-in / Opt-Out  
f) Financial Responsibility Form

**Step #3 Insurance Waive / Enroll**

To waive / enroll in the Student Health Insurance Plan, students must complete the online process at [http://studentbluenc.com/#/fsu](http://studentbluenc.com/#/fsu). Deadline to waive /enroll is for the Fall September 10 and Spring February 1.

**The Fall 2024 Waive /Enroll will not open until June 13th.**

**How to Get Your Immunizations at FSU Student Health Services**

We are a full-service pharmacy serving the university community! We provide medication consultations, fill and refill prescriptions, and offer generic medications that are always available at a low cost to students, faculty and staff. Most prescription insurance plans are accepted at our pharmacy. However, we are not currently contracted with any Medicaid or Medicaid Managed Care plan. Patients with Medicaid or a Medicaid Managed Care plan for pharmacy benefits will be required to pay for the cost of the medication.

If your insurance does not pay for the services, you can use your debit card to pay for the immunization.
GUIDELINES FOR COMPLETING IMMUNIZATION RECORD

**IMPORTANT** — The immunization requirements must be met for enrollment at the University. Failure to comply will result in withdrawal from classes without credit. These records are due at the time of admission.

Be certain that your Name, Date of Birth, and ID Number appear on each sheet. Records must be written in English with the dates of vaccine administration including the month, day, and the year.

**Acceptable Records of your Immunizations may be obtained from any of the following:**
- Personal Shot Records – Must be verified by a doctor’s stamp or signature or by a clinic or health department stamp.
- Local Health Department
- Military Records or WHO (World Health Organization Documents) - These records may not contain all of the required immunizations.
- Previous College or University – Your immunization records do not transfer automatically. You must request a copy.

**FOOTNOTE ¹** – Three doses are required for students entering college or university. Students entering college or university for the first time on or after July 1, 2008 must have had three doses of tetanus/diphtheria toxoid; one of which must be tetanus/diphtheria/pertussis (Tdap).

**FOOTNOTE ²** – A student attending school who has attained his or her 18th birthday is not required to receive polio vaccine.

**FOOTNOTE ³** – Measles vaccines are not required if any of the following occur: Documented physician diagnosis of disease prior to January 1, 1994; a student who has been documented by serological testing to have a protective antibody titer against measles and submits the lab report; or a student born prior to 1957. A student who enrolled in college or university for the first time before July 1, 1994 is not required to have a second dose of measles vaccine.

**FOOTNOTE ⁴** – Mumps vaccine is not required if any of the following occur: A student who has been documented by serological testing to have a protective antibody titer against mumps and submits the lab report; a student born prior to 1957; or enrolled in college or university for the first time before July 1, 1994. A student entering college or university prior to July 1, 2008 is not required to receive a second dose of mumps vaccine.

**FOOTNOTE ⁵** – Rubella vaccine is not required if any of the following occur: 50 years of age or older, a student who has been documented by serological testing to have a protective antibody titer against rubella and submits the lab report.

**FOOTNOTE ⁶** – Hepatitis B series is required for students born on or after July 1, 1994. Serological testing to document protective antibody titer against Hepatitis B is not acceptable. (Heplisav-B, A 2-dose series is acceptable for this requirement. This vaccine is currently available in the U.S. only)

**FOOTNOTE ⁷** – Varicella vaccine is not required if any of the following occur: Documented physician diagnosis of disease, a student has been documented by serological testing to have a protective antibody titer against varicella and submits the lab report; or a student is born before April 1, 2001.

**INTERNATIONAL STUDENTS, STUDENTS WHO HAVE LIVED IN OR TRAVELED TO HIGH-RISK COUNTRIES/TERRITORIES**

Vaccines are required as noted above. Additionally, these students are required to have a TB skin test (PPD or TST) or a TB blood test (T-spot, QuantiFERON® Gold Plus) that has been administered and read at an appropriate medical facility within 12 months prior to the first day of class. (Chest x-ray required if test is positive).

More information is available on the last page of this form.

MENINGOCOCCAL VACCINE WAIVER FORM

The Advisory Committee on Immunization Practices (ACIP) of the U.S. Centers for Disease Control and Prevention (CDC) recommends that first-year college students living in residence halls should receive at least one (1) dose of meningococcal conjugate vaccine before college entry. All students who will be living in campus housing and who are age 23 or younger must submit proof of one (1) dose of meningococcal conjugate vaccine.

Fayetteville State University requires that every student residing in a Housing & Residence Life facility has received a one-time vaccination against meningococcal disease or has signed a waiver. This waiver will detail information on the risks associated with meningococcal disease, the availability, and the effectiveness of vaccine, and that they choose not to be vaccinated for religious or other reasons. Please read below and complete ONE OF THE TWO sections below, as it pertains to you.

**MENINGOCOCCAL VACCINE REQUIREMENT**

I have received the meningococcal vaccine as required by Fayetteville State University Housing & Residence Life for individuals residing in University Housing. Documentation from a physician or health clinic or receipt of vaccine, and date vaccine was administered is has been upload into SHS Patient Portal.

Signature of Patient or Legal Representative

Age

**WAIVER AGE 18 YEARS OR OLDER**

I am 18 years of age or older. I have received and reviewed the information provided on the risk of meningococcal disease and the effectiveness and availability of meningococcal vaccine. I understand that meningococcal disease is a rare but life-threatening illness. I understand that Fayetteville State University requires that an individual enrolled in an institute of higher education in North Carolina who resides in University Housing shall receive vaccination against meningococcal disease unless the individual signs the waiver to the vaccination.

I voluntarily agree to release, discharge, indemnify, and hold harmless FSU from any and all costs, liabilities, expenses, claims, demands, or causes of action on account of any loss or personal injury that might result from my non-compliance with the Universities requirements. I choose to waive receipt of the meningococcal vaccine.

**Risks and Benefits of Meningococcal Vaccination**

<table>
<thead>
<tr>
<th>Vaccine-Preventable Disease</th>
<th>Effectiveness of Vaccine</th>
<th>Possible Side Effects of Vaccination</th>
</tr>
</thead>
<tbody>
<tr>
<td>Meningococcal disease is an acute, potentially severe illness that most often causes meningitis, an infection of the spinal fluid and the fluid that surrounds the brain. It leads to sudden onset of fever, headache, and stiff neck and is usually accompanied by nausea, vomiting, light sensitivity, and altered mental status. Less commonly, it can cause pneumonia, arthritis, and ear/throat infections. Meningococcal disease can result in hearing loss, nervous system problems, seizures, strokes, loss of limbs (arms, legs), and even death.</td>
<td>A protective level of antibody is usually achieved within 7 – 10 days of vaccination. The vaccines protect about 90% of individuals who get them.</td>
<td>The most common side effects are redness or pain at the injection site lasting 1 – 2 days, headache, and fatigue. Serious allergic reactions are very rare.</td>
