

Office of the Chancellor

Dear Campus Community,

At Fayetteville State University (FSU), we seek to create an environment where all employees and students can be fully engaged, feel safe and respected, and be able to thrive. Understanding our campus climate is an important step toward ensuring the future success of our university, students and employees.

On September 16, 2024, FSU will begin campus climate surveys with students and employees. We have contracted with an outside vendor, Campus Climate Surveys, LLC to administer the surveys. The surveys will be online and will be accessible for those who need accommodation.

As we continue to grow, FSU shall continue to ensure that all individuals have opportunities to reach their goals. As part of our commitment to ensuring these opportunities are available to all students and employees, the survey will provide us the necessary feedback to learn how we may strengthen our ongoing policies and programs.

The survey results will be used to identify strengths and opportunities related to ensuring that all individuals are included and treated equally, and that FSU complies with federal and state law prohibiting discrimination and harassment of members of protected classes. **All FSU employees and students are strongly encouraged to complete the survey which will be online from September 16 – October 16, 2024.**

Every voice at Fayetteville State University matters! We want to hear yours!

A handwritten signature in black ink, appearing to read 'T. Allison'.
