

REQUIRED COVID 19 TESTING PROTOCOLS for RESIDENTIAL AND COMMUTING STUDENTS prior to returning to campus for Summer 2021.

We are excited to welcome students to campus in June. To assure smooth move-in, please follow these steps and please do not procrastinate. We want to make sure you have timely access to your residence hall, campus services, and classes.

You Must First Receive COVID-19 Clearance from Student Health Services. This is your very first step upon arriving on campus. Clearance must happen before you check into a residence hall, access campus services, or attend class.

- 1 Provide Medical Documentation.** If you are new to FSU or have not already done so, provide medical documentation (immunizations, health history, and physical exam) to Student Health Services **PRIOR** to May 27. Email your documents to healthservices2@uncfsu.edu or fax your documents securely to (910) 672-1366. Please call (910) 672-1259 if you have questions.
- 2 Receive a negative COVID test result.** There are two options:
 1. Visit an off-site provider and have a test **within 72 hours** of your arrival on campus. Bring a printed copy of your negative test results when you arrive to campus.
 2. Obtain a COVID 19 Rapid test with results from Student Health Services on the day of your move-in appointment. Plan to test in the Rudolph Jones Student Center. The testing and screening process will take about 20 minutes.
- 3 Make a prior appointment for a Clearance Screening at SHS,** Clearance Screenings will take place May 28th from 9am to 2pm in the Rudolph Jones Student Center and on June 1st in the Spaulding Building from 9am-3pm. You may choose to complete the screening on May 26th or May 27th by making an appointment with SHS.

If you are a **residential student**, then the screening is your first step of your move-in appointment. Please arrive to the Rudolph Jones Student Center at least 30 minutes before your scheduled move-in appointment.

If you are a **commuter student**, then call (910) 672-1259 to schedule your appointment, which will also be at the Rudolph Jones Student Center May 28. You may choose to complete the screening on May 26th or May 27th by making an appointment with SHS.

Additional Information

Before Arriving on Campus

We recommend students self-quarantine for a minimum 10 days prior to arriving on campus. Limiting exposure to crowds will reduce your chance of infection. If you test positive in the two weeks **PRIOR** to arriving on campus, follow CDC guidelines and isolate for 10 days. Contact Student Health Services at (910) 672-1259 to make an appointment for your Clearance Screening and confirm when you can return to campus.

Testing Positive Upon Arrival to Campus

Students who test positive upon arrival to campus will be given the option to return home or to move into an isolation hall until they pass a Clearance Screening. COVID positive students will **not** be allowed to move into their residence hall or visit campus facilities.

Weekly Surveillance Testing

Students are required to obtain weekly COVID test through July 30, 2021. Testing will be in the Rudolph Jones Student Center on Tuesday and Wednesdays

If you have been vaccinated, you are exempt from the weekly surveillance testing. Please provide proof of your vaccination at the health screening, so we can update your medical and immunization record.

Any student who tests COVID positive will be required to isolate per CDC guidelines, and you are required to have a negative test to return to housing and/or classes. Your Isolation procedures may be on campus or at your home, but COVID positive students will not be allowed to remain in their normal housing assignment until cleared.

If you have a known exposure to a COVID positive contact, then the following will apply:

- If you are vaccinated, then you do not have to quarantine. You will be required to test every 72 hours until clear by CDC quarantine dates or 14 days.
- If you are not vaccinated, then you are required to quarantine on campus or home. You are required to have a negative test to clear.

Vaccine Clinic

Students may obtain the COVID Vaccine on each Thursdays 1pm to 7pm at the Seabrook Auditorium throughout the summer semester. You may register on-site. Currently the Moderna and Johnson & Johnson vaccines are being given so that you have a choice. After you are completely vaccinated, please provide a copy of your vaccine card so that SHS may update you medical and immunization records.

As always, Student Health Services stands ready to assist students with any of their medical concerns or questions. We request that if you become sick or ill while you are enrolled in Summer School, that you contact our clinic at (910) 672-1259.
